

ABOUT The strike of Teachers in my country

My Name is Peter muiruri iam a kenyan by birth and my school is called Kolamain Primary school I am in class eight and iam doing my kenya certificate of primary education (K.C.P.E) in the end of year.

As a candidate iam facing a big problem because teachers are on strike it has badly affected my studies iam not able to learn like other pupils in abroad iam idle staying at home and loitering in the street like a crazy person. Most of time iam stay at home with out any job there is no teachers in our learning centre.

most of my fellow ~~atti~~ keep friends have involved in drugs and others in prostitution and other bad behaviours because you know that idle minds are the devils workshop others have end up becoming rogues. sometimes it is not possible to do my studies at home because of harsh conditions such us lack of food and other basic needs. sometimes iam not able to burn the midnight oil because most of my friends disturb me because they are not well mannered.

Sometimes my parents are forced to do hard-work such tilling the Garden to get our daily bread. They even clean pigsties from rich people to get money. my mother and my father are paid meagre salary but they ^{have} nothing to do.

Some time i try to read on my own but it is not possible because i had no one to assist me my parents and relatives are not educated so nobody ~~will~~ be on your side i tried my best but it is all in vain.

The strike has made me forgot all most everything that i had been taught by my teachers, i am afraid because the kenya certificate of primary education (K.C.P.E) is waiting for me and i am not well prepared.
