

my destiny was to become a pilot but the strike has made me lose all my hope.

I am very confused because all my friends which I knew that they will become very useful people in the community^{but they} have became as useless as dead person most of them all crazy they work in PUBS and in other illegal business. Others have engaged in early marriage.

I myself will try my best and burn the midnight oil as I can to achieve my goal because I know that education is the key.
